Subject: endogenous workshop planning discussion on Monday: formaldehyde
Attachments: pptforHCHOdiscussion010614DRAFT.pptx

Hi Norm and Ted,

I have attached 4 slides that I think will help us run through some of the major issues regarding the implications of endogenous formaldehyde for our assessment. We will not go into much detail on these (unless people want us to), so I think it should take about 15 minutes for us to lay them out- excluding the myriad unanswerable questions we are likely to encounter. This ppt includes preliminary materials, including some recently-conducted, back-of-the-envelope modeling conducted by Paul that we think represents a really interesting approach; as such, these materials cannot be shared widely or outside of NCEA.

Thanks and happy wildcard weekend (go Eagles!),
Andrew
